Thuin, 29 June 2022

The Agreement

On June 19, 2022, the **FÉDÉRATION CYNOLOGIQUE INTERNATIONALE - FCI** and the **WORLD CAT FEDERATION - WCF** concluded an inter-federal agreement to jointly represent the well-understood interests of dog and cat breeders in the international arena and in the Parliament of the European Union.

Taking care of the welfare of animals bred in the FCI and WCF, the Boards of Directors of the largest international federations of pedigree dogs and cats in the world have agreed to collect all scientific opinions on the welfare and breeding of dog and cat breeds that have become subject to breeding and exhibition restrictions in some countries.

Bearing in mind the social and cultural importance of companion animal breeding in the history of our civilization, the FCI and WCF declare that they make every effort to promote the breeding of healthy and happy dogs and cats, and through appropriate education contribute to reducing the number of homeless companion animals in many countries around the world.

Given the above, FCI & WCF announce their official cooperation.
