

Dr. Gregoire Leroy¹

Current position

Associate Searcher/Professor at the INRA/AgroParisTech joint Animal Genetics and Integrative Biology Unit, currently in secondment to FAO.

Fields of research

Characterization of genetic variability within domestic animals based on a diversity of contexts (developed and developing countries, wild versus domestic populations) and species (cattle, chicken, dog, horse, sheep).

Management and conservation of animal genetic resources based on breeders surveys, meta-analysis, and population simulation.

Education

2008	PhD in Animal Genetics, AgroParisTech, Ecole Doctorale Abies. Advisors: Prof. Etienne Verrier, Dr. Xavier Rognon, <i>Genetic diversity and breed management in dogs</i>
2004	Agronomy Engineer, Institut National Agronomique Paris-Grignon

Dr. Leroy is a member of FCI Scientific commission since 2012.

Prof. Zeev Trainin²

Prof. of Immunology, Koret School of Veterinary Medicine, the Hebrew University of Jerusalem.

Main Fields of research: Transfer of immunity from mother to offspring.

Acquired immunodeficiency in animals and man.

Prof. Trainin is a member of FCI Scientific Commission since 1985, he has presided the commission since 2010.
